## About Me

A frontend developer with 8+ years of experience in creating complex and highly loaded web applications. I specialize in React, TypeScript, and modern JavaScript, focusing on performance, accessibility, and user-friendliness of interfaces.

My responsibilities included:

- MVP development, project architecture design;
- UILib development;
- Task assessment, task setting, task verification;
- Technical debt identification and prioritization;
- Employee onboarding;
- Technical standard compliance control;
- Technology stack development and innovation.

I'm looking for interesting projects and collaborations. I'm open to discussing opportunities at product companies or startups.

I also know that with the development of AI, it is much easier for experienced developers to learn unfamiliar technologies and libraries. I am a proponent of using AI in a gentle and thoughtful manner, rather than blindly generating code. Therefore, if I lack expertise in a particular part of the stack or technology, I am confident that I can quickly learn and contribute to the project.

## Experience

### Team Lead Front-end Developer

**SuperJob | June 2021 - June 2025**

**Situation:** The company is faced with the need to:

- automation of branding creation processes (pages with company descriptions), which took up to 2 weeks manually;
- adding integration with mobile applications;
- outsourcing and reducing the entry threshold of competencies from middle to junior.

**Task:** Separate it into a separate project to automate the creation of branding;

**Action:**

- ✓ Created the core of the TypeScript system, including a parser for automating processes.
- ✓ The system has been adapted for mobile applications.
- ✓ Added autotests and achieved 70% code coverage with autotests.
- ✓ Conducted a code review and mentoring of outsource junior specialists.

**Result:**

- ✓ Reduced the task completion time from 2 weeks to 3 hours.
- ✓ Reduced the cost by 80% through parsing and outsourcing.
- ✓ Added integration with mobile applications to attract major market players.
- ✓ Improved the quality of the code and reduced the number of bugs, got rid of the legacy code.

### Backend

Node.js / Express ● ● ● ● ●

C# / .NET ● ● ● ● ●

### Education

#### Bachelor of Computer Science

**Sevastopol State University | 2012 - 2016**

Skills:

- ✓ Web application design and development
- ✓ Database work
- ✓ Interface creation

### Certificates

**Technologies:** React.js, TypeScript, Jest.

## Senior Front-end Developer

**Pluritech | February 2019 - May 2021**

**Situation:** The company needed to modernize its corporate dashboard and transition from legacy code.

**Task:** Develop a new dashboard using React.js and Next.js, implement Git, and improve workflows.

**Action:**

- ✓ Created a frontend application from scratch using Next.js with SSR.
- ✓ Integrated Headless CMS (Stackbill) to streamline content management.
- ✓ Migrated the team to Git and introduced code review practices.

**Result:**

- ✓ Improved dashboard performance and usability.
- ✓ Accelerated development processes with modern tools.

**Technologies:** React.js, Next.js, JavaScript (ES6+), Git.

## Full-stack developer

**Ten Kites | June 2016 - January 2019**

**Situation:** Needed a high-traffic web app for the restaurant industry to help users with food allergies.

**Task:** Build a scalable app with microservices architecture and social media integration.

**Action:**

- ✓ Developed frontend using Angular.js and Knockout.js; backend with C# and PHP.
- ✓ Integrated Facebook/Twitter APIs to boost user engagement.
- ✓ Optimized performance and cross-browser compatibility.

**Result:**

- ✓ The app gained popularity among users with dietary restrictions.
- ✓ The system scaled effectively under high load.

**Technologies:** Angular.js, Knockout.js, C#, PHP, SQL, Git.
